

DASH™

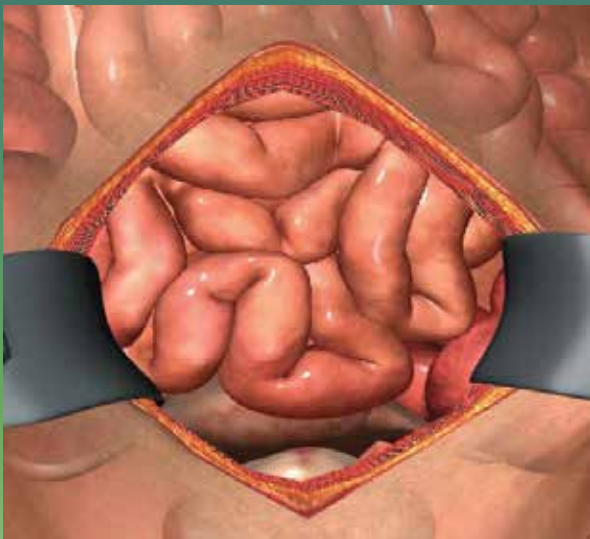

Advanced Simplicity

The “Gold Standard” for Soft Tissue Retraction

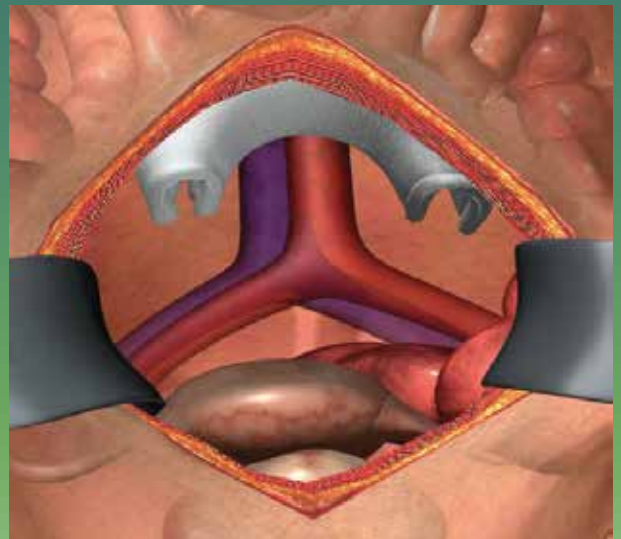

The First and Only Hands-Free,
Disposable, 3-Dimensional, Malleable,
Absorbent Surgical Retractor

Advanced Simplicity – Complete Control

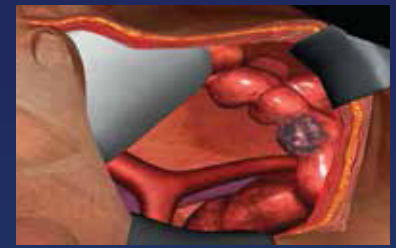

Before DASH™
Challenging access

After DASH™
Maximum exposure

DISTRIBUTED BY:

Innovative, Proprietary Design

- Stainless steel, malleable mesh is surrounded with silastic coating and multiple, integrated layers of absorbent padding for maximum efficiency and control
- Allows for easy detection under x-ray

Atraumatic Retraction Optimal Visualization

- Allows for easy reshaping and reforming during surgery
- Enhances access to surgical site
- Minimizes need for excess bulky metal retractors

Maximum Absorption

- Provides absorption capacity of 12 lap pads in one
- Absorbs fluids for maximum visualization in the operative field

A Simple, Yet Invaluable New Tool For Surgery

Risk Management

- Reduces number of lap pads for easier post-op count
- Minimizes the risk of gossypiboma (foreign body exposure)
- Prevents unnecessary surgical procedures to retrieve retained foreign bodies

Economic Significance

- Reduces OR costs by reducing time spent during post-op manual counts & reconciliation of potentially retained lap pads or instruments
- 91% of users were able to reduce operating room time by 5 – 10 minutes
- 93% of DASH cases use fewer individual laparotomy pads
- Lessens risk of liability and costly medical malpractice litigation

Multiple Sizes Allow for Multidisciplinary Use

General, Colon & Rectal

- Open Gastric Bypass
- Whipple
- Colectomy
- Abdominoperineal Resection
- Lower Anterior Resection
- Colo-Anal J Pouch
- Colostomy Takedown
- Sigmoidectomy
- Bariatric Procedures or Large Incision Sites

Obstetric, Gynecologic & Oncology

- C-Section
- Total Abdominal Hysterectomy
- Bilateral Salpingo Oophorectomy
- Myomectomy
- Utero-Sacral Colpopexy
- MMK

Urologic

- Cystectomy
- Prostatectomy

Thoracic Surgery

- Lobectomy
- Repair of Esophageal Perforation
- Enhanced Access to Thoracic Space

Spine Surgery

- Anterior Access
