# Who We Are

## About U.S. Surgitech

U.S. Surgitech is a small, minority-owned business that began with a revolutionary vision for the surgical consulting industry – to pair excellence in quality and service with unmatched affordability.

Through our unique understanding of product manufacturing and distribution, we strive to provide innovative surgical solutions for each member of our diverse and wide-reaching client base. We distribute a vast selection of products to a varied audience, including outpatient surgery centers, clinics, hospitals and government institutions – many of whom are at the vanguard of healthcare services with their own reputations in excellence to uphold. Our products help make upholding excellence simple.

In an industry that is constantly shifting, adaptability to new best practices and regulations is vital to success. Our cutting-edge services, coupled with our commitment to providing honest solutions, help clients navigate industry changes expertly and quickly.

We devote ourselves to the quality of materials and fine craftsmanship of our product, so clients can conduct healthcare services with confidence and trust.

## Value Provided

---

- Contribute towards diversity initiatives
- Increase patient safety
- Improve O.R. efficiency
- Significant cost savings
- Reduction of SKU's & packages
- Exceptional customer service & reliability

## Mattress Overlay

**Comfort. Protection. Confidence.**

Latex-Free | Fluid-Wicking | Protect Against HAPIs

"Ideal for surgeries requiring extended patient positioning or extra cushioning."

- **Versatile Across Specialties** Designed for use in neuro, orthopedic, vascular, general surgery, and lateral positioning procedures.
- **Effective Pressure Redistribution** Helps reduce the risk of pressure-related injuries during prolonged surgical procedures.
- **High-Density Polyurethane Foam** Delivers reliable support and comfort without bottoming out—even in multi-hour cases.
- **Single-Use for Infection Control** Eliminates the risk of cross-contamination.
- **Full-Length 72" Coverage** Provides comprehensive protection across the entire surgical table.

## Single-Use Grasping & Biopsy Forceps

- Sterile Packed
- 90 Degree Jaw Opening

### Get A Better Grasp On Cystoscopy

Effortless Navigation | Steady Control | Minimizes Infection Risk

#### Y-Connector

A single-use endoscopic adapter designed to prevent irrigant backflow while securing urological devices (such as laser fibers, guidewires, or catheters) during endoscopic procedures. It features a Y shaped body with a straight lumen for device passage and a side port for irrigation connection

Y-Connector

#### Stopcock

A manual valve intended to regulate, divert, or stop the flow of fluids and irrigation through the working channel of a ureteroscope, cystoscope, or other endoscope.

Stopcock

#### Universal Design

Compatible with all disposable & reusable flexible cystoscopes

Biopsy

#### Ergonomic Handle

Allows one-handed operation

Grasping

#### Added Efficiency

Ready when you are, optimizing workflow and patient throughput

## Single-Use Bipolar Maryland Dissector

**Precision You Can Trust. Performance You Can See.**

### Reduce Risk | Improve Efficiency | Control Costs

- ▶ **Performance Consistency** - Every case starts with a new instrument
- ▶ **Patient Safety** - Single-use reduces risk of cross-contamination
- ▶ **Added Efficiency** - No reprocessing delays or repair downtime. Cable integrated into instrument
- ▶ **Cost Transparency** - Predictable per-case cost
- ▶ **Ergonomic Control** - Lightweight, balanced handle for comfort during long procedures
- ▶ **Seamless O.R. Compatibility** - Compatible with standard bipolar generators

## Single-Use One-Piece Fulgerating Bugbee Electrode

**No Assembly. No Reprocessing. No Missing Components.**

**Sterile-Packed | Steady Control | Streamlined Workflow**

- **5FR and 4FR x 58 cm Length** - Provides optimal reach & maneuverability during cystoscopic & other endoscopic procedures.
- **Dome Tip** - Designed for controlled fulguration & precise tissue contact.
- **Fully Integrated, Single-Use Design** - Includes electrode, cable, & connector in one sterile device. No reusable cables to track, reprocess, or replace. The cable comes pre-attached and ready to plug directly into the electrosurgical generator.
- **Compatible** with most standard cystoscopes
- **Eliminates Reprocessing Requirements** - Avoid the time, labor, and infection control risks associated with cleaning and sterilizing reusable components.

| Item Number   | Item Description                                             | Package Quantity |

# **SurgyCut**

## **Single-Use One-Piece Fulgerating Bugbee Electrode**

**Traditional 3-Piece Bugbee  
vs.  
U.S. Surgitech's Integrated  
One-Piece Design**

|                            | <b>Traditional Bugbee Electrode</b>                                         | <b>U.S. Surgitech One-Piece Bugbee Electrode</b>   |
|----------------------------|-----------------------------------------------------------------------------|----------------------------------------------------|
| Components                 | Disposable shaft + reusable cable + reusable adapter                        | Fully integrated electrode with pre-attached cable |
| Assembly Required          | Yes – components must be connected before use                               | None – ready to use out of the package             |
| Reprocessing               | Reusable cable must be cleaned and sterilized                               | No reprocessing required                           |
| Risk of Missing Components | High – cables & adapters are frequently misplaced or accidentally discarded | None – cable is permanently attached               |
| Efficiency                 | Staff must locate and assemble components                                   | Plug directly into the generator and begin         |
| Infection Control          | Reusable components introduce additional handling and sterilization steps   | Fully single-use sterile device                    |
